PROFILE

Highly motivated and creative filmmaker with experience in social media content creation and video editing. Possesses strong communication and problem-solving skills, with a passion for visual storytelling. I am eager to contribute to a dynamic team environment and develop further video editing skills.

I possess a strong technical skillset with proficiency in industry-standard video editing software such as Adobe Suite (Premiere Pro, After Effects), DaVinci Resolve, and Final Cut Pro. Beyond technical expertise, I bring excellent communication and problem-solving skills to the table. This allows me to effectively collaborate with teams and clients to develop creative video content strategies. My passion for visual storytelling fuels my drive to continuously learn and refine my editing skills.

I have well-rounded experience in mobile and desktop app development, adept at utilising various programming languages to craft user-centric solutions. As an Apple Developer, I leverage Swift and SwiftUI to create intuitive and visually appealing interfaces for iOS and macOS applications. My fluency in C++, Java, JavaScript, and C# allows me to tackle projects across diverse platforms and functionalities. This multi-language proficiency empowers me to contribute effectively in collaborative environments and adapt to the specific needs of each project. Further, I have years of experience in the Unity game engine, giving me vast experience across game development and all software types.

I am adept at collaborating with others and possess a background in team-based work, having participated in activities such as Scouts and Fire Cadets. During my three-year cadet tenure, I was twice promoted to the position of crew manager - a role that saw me teaching newer (first-year) cadets everything from basic hose running to ladders and fire science.

I collaborated closely with the community at various events to promote road safety, motorcycle safety, and fire awareness. Additionally, I volunteer at a Warm Hub, which provides warm meals and beverages to elderly, homeless, or ill individuals. These individuals are able to socialise with others of their own age while enjoying their meals.

My extensive experience in the hospitality industry has honed my exceptional customer service abilities, both in-person and over the phone. I thrive under pressure and am adept at managing time constraints, ensuring timely delivery of all commitments.

In November 2024, I moved to New York City to study Filmmaking at the New York Film Academy. I completed the course in February 2025.
